The Paper Preparation Instructions are also paper formatting guidelines. We reserve the right to reject any paper that fails to adhere to these instructions, the conference topic and its sections. Please note that no additional proofreading will be done.

The authors are fully responsible for the content, proofreading and form of the paper.

*Accepted papers will be published in the e-proceedings of the professional conference on its website. The author can submit up to two professional papers. The presentation of papers will take place from 27 to 28 October 2022.*

**Abstract – 12-point Times New Roman, bold, centred**

*The paper abstract (in 12-point Times New Roman, italics) is an integral part of the paper and not an introduction. It should be written in English and should convey the nature, topic, content areas, research question and research methods, main outcomes, findings and conclusions. The purpose of the abstract is to introduce readers to the paper's key points in a succinct manner. The reader should therefore be able to decide from the abstract whether the paper would give any information relevant to their field of interest or studies (e.g. a diploma work, a paper...). The length of the abstract should be up to 1000 characters, excluding spaces.*

Keywords: keyword 1, keyword 2... 12-point Times New Roman (maximum 6 keywords)

## **2 LITERATURE AND REFERENCES (14-POINT TIMES NEW ROMAN, BOLD, LEFT-ALIGNED)**

Literature and references are cited according to a modified Chicago standard.

References should be listed in alphabetical order by the authors' surnames or, alternatively, by the title of the publication (if author is unknown), and numbered in the following way: 1), 2) ... (11-point Times New Roman, left-aligned).

Citations without an author differ from authorial ones only in that they start with a title followed by a year, the rest is the same. If the information recommended in the form is not known, it can be omitted.

In-text citations: in case of two authors, both surnames are cited. In case of several authors, only the first author's surname is cited, followed by “et al.” Citing starts with the word “Source”, then follows the publication year and page number, positioned within parenthesis immediately below the figure/ table /graph”. When citing works by unknown authors, the in-text citation includes the first word or a phrase of the title, the publication year and page number. Authors of the sources that have been read should be cited, but references for the authors of quotes and illustrations should not be included. When citing primary or secondary sources in one or two sentences, the in-text citation should appear within the last sentence. When citing longer sections, e.g. a whole paragraph, the reference is put after the last full stop.

Note: Records → (e.g. **Surname year, page**) are guidelines in citing literature and sources in the text.
